

Enterprise PKI (ePKI)

Deliver trusted Digital Certificates to employees, customers and partners instantly with ease

Managed Service for all your Digital IDs

As e-commerce expands from intercompany electronic exchange to partners, customers and suppliers outside of the trusted network, Enterprises' ability to secure critical data, protect company IP and meet government and industry regulations must keep pace with the speed of data being exchanged across unsecured networks.

Enterprise PKI (ePKI) is a managed service model that provides administrators the essential tools for full control of how Digital IDs (also known as Digital Certificates) are issued and managed under the organisation's legal name. The issued Digital IDs allow organisations to facilitate company-wide policies for secure e-mail, documents and networks. Users can issue digital certificates to multiple employees, suppliers and extranet users instantly against pre-vetted organisation Certificate profiles.

What can ePKI be used for?

Digital IDs available via GlobalSign's ePKI managed service portal provide a key component in securing emails and delivering trusted documents electronically. ePKI is capable of issuing two GlobalSign Certificate types – PersonalSign and DocumentSign. PersonalSign Digitals IDs allow email users to digitally sign and encrypt email and can also be used to produce instantly validated Microsoft Office Suite Documents (Word, Excel, PowerPoint). DocumentSign Digital IDs add digital signatures and certification to allow fast creation of instantly validated and time-stamped Adobe PDF documents.

Document Signing
for Adobe PDFs & MS
Office Documents

**E-mail Signatures &
Encryption**

Digital IDs
Secure Network Access

ePKI Features

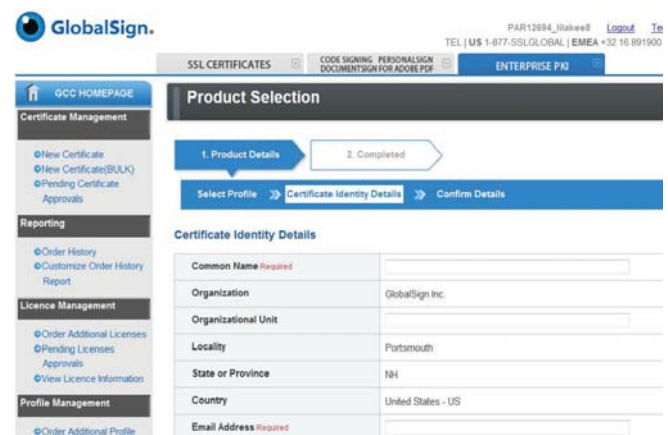

- **Instantly Trusted and Verified** signatures in most popular applications via ubiquitous digital credentials
 - **PersonalSign Pro class 2** - Windows publically trusted certificates for secure Microsoft Office Suite documents and Secure E-mail
 - **DocumentSign** - for secure Adobe PDF documents Certified Document Services
- **Unlimited Administrators** allowing the Enterprise to meet "around the clock" needs of mission critical applications
- **Robust Reporting** with easy search capabilities providing ePKI administrators a method to review the status of issued certificate and pending requests
- **Public ordering URLs** provide support for "Open enrollments"
- **Company Branding** via customised email templates allowing customised messages to your end users
- **Revocation and CRL certificates** allowing ePKI administrators to revoke certificates from their ePKI portal. Revoked certificates will be automatically added to the Certificate Revocation Lists (CRLs)

Simplified On-Demand Digital ID Management

The ePKI platform is a simple, easy to use web-based portal for non-technical managers with around the clock access for issuing and managing Digital IDs. All Digital IDs are issued from pre-vetted legal identities (Certificate Profiles) ensuring that proper audit trails are in place for true transparency. Full Digital ID management features (issuance, renewal, reporting and revocation) are accessible 24/7 – essential for organisations operating globally and often with temporary resources or partnerships.

ePKI has been designed to be "user friendly" resulting in an easy to use and intuitive interface that can be managed by either technical or non technical personal. ePKI sits side-by-side with other GlobalSign products, such as GlobalSign's leading SSL Certificates, resulting in a true "one stop online security shopping" experience.

Issuing Digital IDs from a pre-approved Certificate Profile is easy. Simply type the end user's name and email, establish a "Digital ID pick-up" password and let ePKI do the rest of the work!

ePKI Benefits

- **Zero Footprint** application through an easy to use Web browser interface
- **Immediate Certificate Issuance** to employees, customers, business partners, and devices
- **Cost Effective** with no hidden fees – simply purchase packs of certificates that include 10% free certificates used to cover employee attrition and support
- **One Stop PKI Shop** part of GlobalSign's Certificate Center (GCC) portal allowing Administrators a single portal to acquire all types of GlobalSign Digital IDs including:
 - SSL Certificates
 - Code Signing Certificates
 - Client Certificates
